DETAILED ACTION

This action is issued in response to the amendment/RCE filed 5/13/08.

Response to Amendment

Claims 1-11, and 15-20 were amended. Claims 12-14 were withdrawn from consideration.

Election/Restrictions

Newly submitted claims (1-6) Group I, and (7-11, 15-20) Group II are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The claimed invention in amended claims 1-6 is directed toward the software that is accessible by the clients which is classified in class 707/9. and amended claims 7-11, and 15-20 are directed to a software the reconfigure the client as a server which is classified in 707/102.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7-11, and 15-20 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Regarding claims 1-6 the claimed invention is directed to non-statutory subject matter. Since the claimed invention is software per se. therefore it is non-statutory.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation “ a software” in line 3 of the third limitation. There is insufficient antecedent basis for this limitation in the claim. It is unclear to the examiner if the software claimed is the same software claimed previously in the claim or not. Clarification is required.

Claim 1 recite the limitation “adapted to” it is indefinite if the functionality is actually claimed or it is only showing the capability of the system. Clarification is required.

Although no art is applied in this office action, No indication of allowable subject matter are made due to the utility issues raised under 35 USC 101 and 112 rejections.

The fundamental issues exist in the record. The independent claim of record call for any manner of software or application to re-configure a computer to function as a server, whereas it is not possible for all forms of software to perform this function. In general, the claims should be further amended to recite the specific software needed to accomplish the re-configuration, and clarified to recite that this necessary software will be transferred to the workstation or client actually being re-configured.
